

CHAPTER V

CONCLUSION AND SUGGESTION

A. The Conclusion

Based on the research, in the tenth grade students at SMA Primbana Medan, the researcher made a video as the teaching media for helping students learn to listen to narrative text. Using video as a teaching media is a good way to attract the students' willingness to share their ideas creatively in narrative text. The researcher used audio-visual media because it is an appropriate media that can be applied in the class.

Based on expert theory (Smaldino, Russell, Heinich, and Molenda) about the effectiveness of using video as a media in the teaching and learning process, In general, students will be more engaged in the learning process if the teacher can use an interesting medium to transfer material in the classroom. The audio-visual media used in this research can help students in understanding narrative text. The teacher can also use the teaching listening narrative text.

B. The Suggestions

There are three suggestions that the researcher gives, they are:

1. For the teachers, the researcher suggest that they apply video as teaching media in listening narrative text. The media of video is one of alternative ways to improve students' ability and interest in listening.
2. The students, by implementing of teaching media could help the students to improve their ability in listening and their interest
3. For the other researcher, in developing the media, especially by using the video make sure that the video can be interesting to improve their ability in listening skill.
