

ABSTRACT

Pardede, Christy Gita Putri. 2173121014. Developing Interactive Electronic Book Using Flip PDF Professional as Digital Learning Media for Writing Narrative Text in Grade X Senior High School. A thesis. English Education Program, Faculty Language and Arts, State University of Medan, 2022.

The goal of this study was to develop interactive e-book using Flip PDF Professional as digital learning media for writing narrative text in grade X at SMA Global Prima Medan. This study was classified as a research and development (R&D) study. Conducting a need analysis, creating a program, validating it with an expert, revising it, and producing the final product were the steps. The thirty-five students in class X MIPA 1 in Global Prima National Plus School were the subjects of this research. Questionnaires were used to obtain the information. The results of this study show that interactive e-books for teaching narrative texts are effective and practical. It can be determined from the results of the validator's validation, as well as the teacher's and student's responses after using this interactive media. The validator's results showed a value of 93.4 percent, which is considered very valid. Furthermore, the teacher's response showed score of 95.5 %, which was classified as very practical. In addition to the results of the student replies, 93.6 % of the results are characterized as very practical.

Keywords: Research and Development (R & D), Interactive E-Book, Narrative Text.
