

## **CHAPTER V CONCLUSION AND SUGGESTIONS**

### **5.1 Conclusion**

Based on the research data that has been obtained, data analysis and hypothesis testing, it can be concluded There is an effect of the Problem Based Learning learning model on student learning outcomes on the material of the human skeletal system in class VIII of SMP Negeri 14 Medan.

### **5.2 Suggestions**

Based on the results and conclusions of this study, the researchers have several suggestions, namely:

1. The next researcher should master all the syntax in learning using the Problem Based Learning model and be able to manage time according to the syntax.
2. For further researchers who want to do further research with the same learning model, it is expected to prepare tools and materials and necessities that support research so that study can run effectively.
3. For maximum results, the next researcher can take more sample
