

## ABSTRAK

**Abednego Siagian: Hubungan Pengalaman Praktek Kerja Industri Dan Soft Skill Terhadap Kesiapan Kerja Dunia Industri Siswa Kelas XII TBSM SMK NEGERI 2 MEDAN Tahun Ajaran 2022/2023. Skripsi. Fakultas Teknik Universitas Negeri Medan.2023**

Tujuan penelitian ini untuk mengetahui besar nilai hubungan pengalaman praktek kerja industri dan *soft skill* terhadap kesiapan kerja dunia industri siswa kelas XII TBSM di SMK Negeri 2 Medan. Penelitian ini menggunakan pendekatan penelitian kuantitatif dengan metode penelitian assosiatif, memakai instrumen angket model *likert* dan nilai hasil praktek kerja industri siswa. Jumlah sampel pada penelitian ini berjumlah 97 siswa, teknik pengambilan sampel menggunakan *total sampling*. Uji validitas menggunakan korelasi *Product Momen* dan uji reliabilitas menggunakan *Alpha Croncbach*. Teknik analisis yang digunakan adalah Analisis Regresi Linear Berganda.

Hasil penelitian bahwa (1) Terdapat hubungan positif dan signifikan antara Pengalaman Praktek Kerja Industri terhadap Kesiapan Kerja Dunia Industri Siswa dengan dengan nilai korelasi *product moment* sebesar  $r_{x_1y} = 0.600$  dan nilai korelasi parsial sebesar 0.304 pada Pengalaman Praktek Kerja Industri(X1). (2) Terdapat hubungan positif dan signifikan antara *Soft skill* terhadap Kesiapan Kerja Dunia Industri Siswa dengan nilai korelasi *product moment* sebesar  $r_{x_1y} = 0.905$  dan nilai korelasi parsial sebesar 0.913 (3) Terdapat hubungan positif antara Pengalaman Praktek Kerja Industri dan *Soft skill* terhadap Kesiapan Kerja Dunia Industri Siswa Kelas XII TBSM SMKN 2 Medan Tahun Ajaran 2022/2023 dengan besarnya nilai dari  $F_{hitung}$  adalah 239.086 dan nilai signifikansi sebesar 0.000. Maka dari itu dapat disimpulkan nilai  $F_{hitung} > F_{tabel}$  ( $239.086 > 3.09$ ) dan nilai signifikansi ( $0.000 < 0.05$ ).

**Kata Kunci: Pengalaman Praktek Kerja Industri, Soft skill, Kesiapan Kerja**

## **ABSTRACT**

Abednego Siagian: *The Relationship between Industrial Work Practice Experience and Soft Skills on Job Readiness for the Industrial World of Class XII TBSM Students at SMK NEGERI 2 MEDAN for the Academic Year 2022/2023. Essay. Faculty of Engineering, Medan State University. 2023*

The purpose of this study was to find out the value of the relationship between industrial work practice experience and soft skills on work readiness in the industrial world for class XII TBSM students at SMK Negeri 2 Medan. This study uses a quantitative research approach with associative research methods, uses a Likert model questionnaire, and scores the results of student industrial work practices. The number of samples in this study amounted to 97 students, the sampling technique used total sampling. Validity test using Product Moment correlation and reliability test using Alpha Cronbach. The analysis technique used is Multiple Linear Regression Analysis.

The results of the study are (1) There is a positive and significant relationship between Industrial Work Practice Experience and Students' Industrial World Work Readiness with a product moment correlation value of  $r_{x1y} = 0.600$  and a partial correlation value of 0.304 on Industrial Work Practice Experience (X1). (2) There is a positive and significant relationship between Soft skills on Student Industrial World Work Readiness with a product moment correlation value of  $r_{x1y} = 0.905$  and a partial correlation value of 0.913 (3) There is a positive relationship between Industrial Work Practice Experience and Soft skills on World Work Readiness Student Industry Class XII TBSM SMKN 2 Medan Academic Year 2022/2023 with the value of Fvalue being 239,086 and a significance value of 0,000. Therefore it can be concluded that the value of  $F_{value} > F_{table}$  ( $239.086 > 3.09$ ) and a significance value ( $0.000 < 0.05$ ).

**Keywords: Industrial Work Practice Experience, Soft skills, Job Readiness**
