

ABSTRAK

Dewi Wiliyana Hutagalung: Analisis Hasil Praktek Penataan Sanggul Cepol Siswa SMK Pariwisata Imelda Medan.2024.

Penelitian ini bertujuan untuk mengetahui hasil praktek penataan sanggul cepol siswa SMK Pariwisata Imelda Medan. Penelitian ini dilaksanakan pada bulan oktober 2023. Lokasi penelitian di SMK Pariwisata Imelda Medan. Populasi penelitian adalah siswa kelas XI jurusan tata kecantikan SMK Pariwisata Imelda Medan sebanyak 30 siswa. Pengambilan sampel menggunakan total sampling. Analisis data menggunakan teknik deskriptif, persyaratan analisis dengan menggunakan kesepakatan pengamat dan persentase. Instrumen penelitian yang digunakan adalah lembar pengamatan penataan sanggul cepol yang diamati oleh tiga orang pengamat. Dua orang pengamat berprofesi sebagai guru bidang studi tata kecantikan dan satu orang pengamat berprofesi sebagai dosen tata rias. Hasil penelitian menunjukkan bahwa tingkat kemampuan siswa kelas XI jurusan tata kecantikan SMK Pariwisata Imelda Medan dalam melakukan penataan sanggul cepol tergolong cukup, dimana skor tertinggi siswa sebesar 20 dan skor terendah siswa sebesar 12. Nilai rata-rata siswa 12,5. Setelah dilakukan uji kesepakatan pengamat penataan sanggul cepol diperoleh Berdasarkan tabel diatas dapat di peroleh $\frac{k}{k-1} = 1,25$ dan nilai $1 - \frac{\sum \sigma_b^2}{\sigma_t^2} = 0,738621$ dan nilai $r_{ac} = 0,92$ dengan demikian dapat disimpulkan bahwa penilaian dari ketiga pengamat dikatakan reliabel (konsisten) dengan nilai $0,92 > 0,60$. Berdasarkan hasil penelitian menunjukkan sebanyak 14 siswa (47%) mendapatkan hasil yang tinggi, sebanyak 16 siswa (53%) mendapatkan nilai cukup, maka secara umum dapat disimpulkan bahwa hasil penataan sanggul cepol siswa kelas XI SMK Pariwisata Imela Medan tergolong cukup sebanyak 53%.

ABSTRACT

Dewi Wiliyana Hutagalung: Analysis Of The Results Of The Praticce Of Styling A Bun For Imelda Pariwisata Vocational School Students Medan. 2024

This research aims to find out the results of the practice of styling a bun bun for Imelda Medan Tourism Vocational School students. This research was carried out in October 2023. The research location was Imelda Tourism Vocational School, Medan. The research population was 30 class XI students majoring in beauty and beauty at the Imelda Tourism Vocational School, Medan. Sampling used total sampling. Data analysis uses descriptive techniques, analysis requirements use observer agreement and percentages. The research instrument used was an observation sheet on the arrangement of the bun bun which was observed by three observers. Two observers work as teachers in the field of cosmetology studies and one observer works as a cosmetology lecturer. The results of the research show that the level of ability of class After carrying out the observer agreement test, the bun arrangement was obtained. Based on the table above, it can be obtained that $k/(k-1) = 1.25$ and the value $1 - (\sum \sigma_b^2) / (\sigma_t^2) = 0.738621$ and the value $r_{ac} = 0.92$, thus it can be concluded that the assessments from the three observers are said to be reliable (consistent) with a value of $0.92 > 0.60$. Based on the research results, it shows that 14 students (47%) got high results, 16 students (53%) got fair marks, so in general it can be concluded that the results of styling the bun bun for class.
