

ABSTRAK

Hana Almaira Harahap, NIM: 5163342004, “Hubungan Kesiapan Belajar Dengan Hasil Praktik Mata Pelajaran Pengolahan dan Penyajian Makanan Siswa di SMK Putra Anda Binjai”. Skripsi Jurusan Pendidikan Kesejahteraan Keluarga. Program Studi Pendidikan Tata Boga. Fakultas Teknik Universitas Negeri Medan, 2021.

Penelitian ini bertujuan untuk mengetahui: (1) kesiapan belajar siswa ; (2) Hasil Praktik Pengolahan dan Penyajian Makanan ; (3) Hubungan Kesiapan Belajar Dengan Hasil Praktik Pengolahan dan Penyajian Makanan Siswa di SMK Putra Anda Binjai.

Populasi dalam penelitian ini adalah siswa kelas XI SMK Putra Anda Binjai dengan jumlah 46 orang. Waktu Penelitian dilaksanakan pada bulan Desember 2020. Pengambilan sampel digunakan teknik *total sampling*, sehingga yang menjadi sampel penelitian adalah siswa kelas XI Jasa Boga dengan jumlah 46 orang. Metode pengumpulan data kesiapan belajar siswa dengan menggunakan angket dan pengumpulan data hasil praktik pengolahan dan penyajian makanan siswa dengan menggunakan pengamatan. Analisis data menggunakan teknik deskriptif korelasional, persyaratan analisis dengan uji normalitas, uji linieritas. Sedangkan uji hipotesis dengan korelasi *product moment*.

Berdasarkan hasil penelitian ditunjukkan bahwa tingkat kecenderungan kesiapan belajar siswa kelas XI SMK Putra Anda Binjai cenderung baik yaitu 34,78%, dan Hasil Praktik Pengolahan dan Penyajian Makanan cenderung baik yaitu sebesar 36,96%. Bentuk persamaan garis $Y = 2,87 + 0,37 X$ merupakan regresi linier, dimana $F_{hitung} < F_{tabel}$ yaitu $(-2,66 < 2,41)$. dengan taraf kepercayaan $\alpha = 0,05$ dan koefisien arah regresi Y atas X adalah berarti karena $F_{hitung} > F_{tabel}$ ($1108,5 > 4,06$). Dari hasil analisis korelasi diperoleh r_{xy} sebesar 0,916 sedangkan nilai r_{tabel} pada taraf signifikan 5% dengan $N = 46$ adalah sebesar 0,291. Dengan demikian harga $r_{hitung} > r_{tabel}$ ($0,916 > 0,291$) dan harga $t_{hitung} > t_{tabel}$ ($15,13 > 2,021$). Maka dapat disimpulkan bahwa terdapat hubungan yang signifikan antara kesiapan belajar dengan Hasil Praktik Mata Pelajaran Pengolahan dan Penyajian Makanan Siswa Kelas XI SMK Putra Anda Binjai.

Kata Kunci: Kesiapan Belajar, Hasil Praktik, Pengolahan dan Penyajian Makanan

ABSTRACT

Hana Almaira Harahap, NIM: 5163342004, "The Relationship between Learning Readiness and the Results of Student Food Processing and Serving Practices at SMK Putra Anda Binjai". Thesis of the Department of Family Welfare Education. Catering Education Study Program. Faculty of Engineering, State University of Medan, 2021.

This study aims to determine: (1) students' learning readiness; (2) Results of Food Processing and Serving Practices; (3) The relationship between study readiness and the results of student food processing and serving practices at SMK Putra Anda Binjai.

The population in this study were students of class XI SMK Putra Anda Binjai with a total of 46 people. When the study was carried out in December 2020. The sample was taken using total sampling technique, so that the sample of the study were students of class XI Catering Services with a total of 46 people. Methods of data collection students' readiness to learn using a questionnaire and data collection results from the practice of processing and serving students food by using observations. Data analysis using descriptive correlational techniques, requirements analysis with normality test, linearity test. Meanwhile, hypothesis testing with product moment correlation.

Based on the results of the study, it was shown that the level of learning readiness of class XI students of SMK Putra Anda Binjai tended to be good, namely 34.78%, and the results of the practice of processing and serving food tended to be good at 36.96%. The form of the line equation $Y = 2.87 + 0.37 X$ is a linear regression, where $F_{count} < F_{table}$ is $(-2.66 < 2.41)$. with the level of confidence $\alpha = 0.05$ and the regression coefficient Y on X is meaningful because $F_{count} > F_{table}$ $(1108.5 > 4.06)$. From the results of the correlation analysis, it was obtained that the r_{xy} value was 0.916, while the r_{table} value at the 5% significant level with $N = 46$ was 0.291. Thus the price $r_{count} > r_{table}$ $(0.916 > 0.291)$ and the price $t_{count} > t_{table}$ $(15.13 > 2.021)$. So it can be concluded that there is a significant relationship between learning readiness and the results of the practice of food processing and serving of class XI students of SMK Putra Anda Binjai.
