CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the hate speech that occur in the tweets of Harry Maguire's Twitter Account as the data on the previous chapter, the researcher discovered the following conclusions:

1) There were five types of hate speech used in the tweets of Harry Maguire's Twitter Account, namely Behavior, Physical, Class, Ethnicity, and Sex Orientation. The most frequently used was behavior.

2) The hate speech in the tweets of Harry Maguire's Twitter Account contained some intentions that was dominantly insulting. The rest were mocking, accusing, insinuating, and blaming.

Based on the findings above, it shows that on the comments of Harry Maguire's Twitter Account, the most frequently used types of hate speech was behavior. The most frequently used intentions of hate speech was insulting. The writer finds why netizen utterance hate speech on the commentary because the netizen wanted to show the hatred but via social media twitter.

B. Suggestion

The researcher suggests English students or future researcher to learn more about hate speech not only from class but also from other source, such as journal, e-book, library, etc. The researcher hope that this research can help the future researcher who has interest in hate speech comments on twitter use this research as the reference of their research using the same theory.
