

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **5.1 Conclusion**

After gaining and analyzing the data, it could be concluded as following:

Worksheet developed by adjusting the students' need and the basic competences demands. On May, 25<sup>th</sup> 2022, the need analysis was conducted to identify the learning needs and target needs of the seventh grade students of SMP Swasta Sinar Husni. The respondents were 25 students in the class VII-3. Next step, after conducting the need analysis, the course grid was written based on the students' preferences about target need and learning need also the syllabus in curriculum 2013. The first draft of the material was written after writing the course grid exist. There are five stages of scientific approach: observing, questioning, experimenting, associating, and communicating was written in the materials. In conclusion, the experts had been validated the worksheet. The average evaluation from all aspects was 4.5. It was categorized as "Very Good" that had given by the result from the validator. Therefore, the developed electronic worksheet in teaching writing based on Wizer.me that using Scientific Approach was appropriate to be used by the seventh grade students of SMP Swasta Sinar Husni.

#### **5.2 Suggestion**

By actively participating in English classes in seventh grade, Junior High School students should emphasize a communicative circumstance in the learning and teaching process. If participants do not participate creatively and actively in

the English teaching and learning process, the produced electronic worksheet will not perform properly. As a result, students must finish the tasks completely in order to enhance their writing skills.

The English teacher is one of the most important factors in ensuring the success of the learning and teaching process. To acquire the research's goal, teachers must understand their students' needs in order to become more creative in leading them to write using electronic student worksheets based on Wizer.me. In the students' electronic worksheet, teacher suggestions such as having to add more sources to enhance the skills were developed. If possible, the teacher can develop an appropriate worksheet through observation and need analysis because if the materials can support students' needs, they can further develop the materials.

To other developers can develop better electronic student worksheet based on Wizer.me in the other English skill, such as: reading and speaking. In addition, it supposes to other developers to define the needs of the learners and the demands of the curriculum. Therefore, developers should be more innovative to get the interest of students in the form of electronic student worksheet.
