

ABSTRAK

M.FIKRI RYAN DHANI. Pengaruh Layanan Informasi Dengan Model *Project Based Learning* Terhadap Perencanaan Studi Lanjut Siswa kelas XI IPS 1 Di SMA Negeri 3 Panyabungan Tahun Ajaran 2023/2024. Skripsi. Medan: Fakultas Ilmu Pendidikan Universitas Negeri Medan. 2023.

Penelitian ini bertujuan untuk mengetahui pengaruh layanan informasi model *project based learning* terhadap perencanaan studi lanjut siswa kelas XI IPS 1 SMA Negeri 3 panyabungan. Jenis penelitian ini adalah penelitian kuantitatif dengan pendekatan eksperimen semu. Subjek penelitian kelas XI IPS 1 dengan jumlah 31 siswa. Data penelitian ini dikumpulkan dengan angket yang sudah valid dan reliabel. Angket diberikan sebelum dan sesudah layanan informasi. Data skor rata-rata *pre-test* 74 dan skor rata-rata *post-test* 133 maka selisih skor rata-rata 59 dengan persentase 44 %, artinya rata-rata perencanaan studi lanjut siswa lebih tinggi sesudah diberikan layanan informasi dengan model *project based learning*. Data analisis menggunakan *uji paiered sample T test* untuk melihat apakah ada pengaruh positif dan signifikansi pemberian layanan informasi dengan model *project based learning*. Berdasarkan hasil perhitungan uji *paiered sample T test* diperoleh hasil bahwa Sig. (2- tailed) sebesar $0.000 < 0.05$ dan t_{hitung} sebesar 21,176 $> t_{tabel} = 1,697$, artinya H_0 ditolak dan H_a diterima. Dengan demikian bahwa terdapat pengaruh layanan informasi dengan model *project based learning* terhadap perencanaan studi lanjut siswa kelas XI IPS 1 SMA Negeri 3 Panyabungan Tahun Ajaran 2023/2024.

Kata Kunci : Layanan Informasi, *Project Based Learning*, Perencanaan Studi Lanjut.

ABSTRACT

M.FIKRI RYAN DHANI. The Influence of Information Services Using the Project Based Learning Model on Advanced Study Planning for Class XI IPS 1 Students at SMA Negeri 3 Panyabungan T.A 2023/2024. Skiripsi. Medan: Faculty of Education, Universitas Negeri Medan. 2023.

This research aims to determine the influence of project based learning models information services on planning further studies for class XI IPS 1 SMA Negeri 3 Panyabungan students. This type of research is quantitative research with a quasi-experimental approach. The research subjects were class XI IPS 1 with a total of 31 students. This research data was collected using a valid and reliable questionnaire. The scale is given before and after the information service. The average score data is 74 and the average post-test score is 133, so the difference in the average score is 59 with a percentage of 44%, meaning that the average student's further study planning is higher after being provided with information services using the project based learning learning model. Data analysis uses a paired sample T test to see whether there is a positive and significant influence on the provision of information services using the project based learning model. Based on the calculation results of the paired sample T test, the result was that Sig. (2-tailed) is $0.000 < 0.05$ and tcount is $21.176 > ttable = 1.697$, meaning that H_0 is rejected and H_a is accepted. Thus, there is an influence of information service with project based learning model on the planning of further studies for class XI IPS 1 students at SMA Negeri 3 Panyabungan for the 2023/2024 academic year.

Keywords :Information Services, Project Based Learning, Planning for further studies.
