

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the data, conclusion are drawn as the following

1. There are 5 concepts of gender inequality experienced by the female characters in *Enola Holmes 2* (2022), namely: Paid Work (8.34%), Household Production (12.5%), Culture (33.3%), Violence (33.3%), and The State (12.5%). The most dominant women experienced gender inequality through Violence and Culture.
2. In solving the woman's against gender inequality, the woman characters use many ways through their action in the movie *Enola Holmes 2*, such established a detective agency, match girl strike and using rationality and intelligence as a form of resistance. The reason why women are against gender inequality is because characters face discrimination from society through their utterances or their acts.
3. Gender inequality is still problems in society, and women must continue to fight for equality and equal rights with men. Women should strive for integrity and justice, dare to express their opinions and stand up for themselves and not be afraid to show their abilities.

B. Suggestions

The researcher has three suggestions for readers to consider when conducting similar study. The suggestions were as follows:

1. The findings of the woman against gender inequality above should encourage readers to study more deeply about gender inequality because there are still many things that need to be explored in feminist studies about inequality between women and men, especially in movies.
2. This research is limited to only discussing the ways women's characters reached their rights and the reasons for their struggle against the inequality they experienced. For further research, this can be continued by discussing Enola Holmes as the main character or other characters in the movie, to be specific.
3. For women, their struggles must continue for the sake of their lives.
