

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the the research, the researcher conclude that :

1. The development of the appropriate procedure text is needed for Twelfth Students of Automotive Engineering Study Program at SMK Swasta Cerdas Bangsa. The procedure texts are developed based on scientific approach and it is used to construct the procedure documents.
2. Two specialists' endorsements of the created reading materials serve as proof. The average scores from the first validator, an English teacher, are 6.1, or 85%, and from the second validator, an English lecturer, they are 6.2, or 81%. The fact that it is rated "good" indicates that reading materials were created with SMK Swasta Cerdas Bangsa in twelfth grade students in mind.

#### B.Suggestion

According to the aforementioned conclusion, the following recommendations are made:

1. English teacher at vocational high school must take into account needs of student's major. English teacher must apply more creativity to design English reading materials in procedural text according to demands of Automotive Engineering Students or to construct it simpler for students to comprehend reading and create the successful learning process in the class.

2. Students must obtain proper textbook that is appropriate to their needs because it makes the students interest in learning English. Constructing reading materials for SMK Swasta Cerdas Bangsa for Twelve grade students will make learning English easier.
3. In order to create reading materials for Automotive Engineering Study program, other researchers who conduct the same study should locate several reference
