ABSTRACT

SRI MULYANI MANIK. Analysis of Management of Early Childhood Education Facilities and Infrastructure in Pergetteng-Getteng District, Sengkut Regency. Pakpak Bharat. Skripsi. Medan: Faculty of Education. Universitas Negeri Medan. 2024.

The research is intended to look at the management of PAUD facilities and infrastructure in Pergetteng-getteng Sengkut District, Kab. Pakpak Bharat. This is intended so that the school can see the situation of available facilities and infrastructure. Ultimately, the output of this research can be used as a guide for improving school facilities and infrastructure. This research is descriptive research using qualitative methods. The data collection methods used in this research are observation and documentation methods. The source of the information is the school principal and PAUD teacher in Pergetteng-getteng Sengkut District, Regency. Pakpak Bharat. The data analysis technique used is the Milles and Huberman model which includes three steps, namely, reduction, data presentation, and drawing conclusions. The data validity technique used is triangulation. Based on the research findings, it can be concluded that the condition of PAUD Kasah, PAUD Rampak, RA Qurrota A'yun and PAUD Karina as a whole does not meet NSPK standards (Norms, Standards, Procedures and Criteria) and there are still incomplete facilities and infrastructure. Of the 7 NSPK requirements, there were 4-5 requirements that were met in all schools studied. PAUD located in Pergetteng-getteng Sengkut District, Kab. Pakpak Bharat still needs help, both independently and from the government. Facilities and infrastructure that are inadequate require evaluation before being used in schools. This evaluation is intended to sort out which facilities and infrastructure are suitable for use and which are not, which can ultimately minimize abandoned facilities and infrastructure in the future.
