

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

Based on the findings and chapter IV, the following conclusions were reached: the media podcast was designed by merging the resources from observing the existing media until distributing the questionnaires to the students. As a result, a new podcast was designed as a teaching listening media. Following that, the instructional media was evaluated by two experts who used expert judgment to identify deficiencies or gaps so that the researcher might improve it. The first expert scored 85%, while the second scored 95%. The findings demonstrated that the podcast was a genuine and appropriate media for students in grade tenth at SMA Negeri 13 Medan to study and listen to narrative content about folklore. Students and teachers can see the media on their smartphones after the podcast has been generated. Based on the data, it was found that podcasting as a teaching and learning media might be one of the suggested tools, particularly in listening.

B. Suggestions

The following suggestions must be considered in conducting the related research. For teachers, researcher suggested that teacher would use Podcast for students' need in mastering listening ability. It advised that during the teaching and learning process, the teacher should be more responsive to the requirements of

the students, such as when selecting learning material and using media. Teachers could leverage a range of resources to create exciting and imaginative material. The teacher should provide the appropriate media align with the students' needs.

It is also suggested to students must learn more and practice their listening skills inside or outside the classroom to improving their listening skills by using Podcast as their media since students are very close to the smartphone. The students also need to be actively participated in the teaching and learning process to enhance the other skills besides the listening skill.

For the next researcher needs to be aware before using podcast as the learning media as it needs optimal preparation such as tools for the editing, selecting stories from trusted sources, supporting environment, as well as good connection to the internet. Researcher hoped that next researcher would do better in conducted the Podcast and used the other type of podcasts.
