

ABSTRACT

Cindy Sinaga, Registration Number 2203321008, Developing Translation English Teaching Material of Recount Text using The English Textbook ‘When English Rings a Bell’ for Eighth Grade at SMP NEGERI 1 SIANTAR, A Thesis, English Department, Faculty of Language and Arts, State University of Medan, 2024.

This study is a research on developing translation teaching materials using textbooks on Recount Text material at SMP NEGERI 1 SIANTAR. This study aims to improve students' translation skills using textbooks as the leading learning media. The development of this teaching material is expected to help students improve their translation skills for understanding Recount Text material. Participants in this study were 28 students of class VIII of SMP NEGERI 1 SIANTAR. This study uses a research and development design with the ADDIE model developed by Molenda and Reiser (2003). This study was conducted through 5 main stages: (1) Analysis, which aims to determine the initial needs in carrying out development. (2) Design is a stage that aims to carry out a design according to the needs in the analysis stage. (3) Development is a product test by expert validators. (4) Implementation and distribution of products that have been developed. (5) Evaluation and product improvement based on the results of all previous stages. Teaching materials were validated using a questionnaire distributed to 2 validators, including Dr. Masitowarni Siregar, M.Ed. (Lecturer of English Education, State University of Medan) and Kristonny Panjaitan (English Teacher of SMP NEGERI 1 SIANTAR). With the results of the assessment by the validator, the development of translation teaching materials on recount text material using textbooks is feasible and valid for use in English learning for grade VIII students at SMP NEGERI 1 SIANTAR.
