

CHAPTER V

CONCLUTION AND SUGGESTION

This chapter presents the conclusion and suggestion based on the findings and discussions of data analysis.

a. Conclusion

Based on the research findings and discussion in the previous chapter it can be conclude as follows :

The teacher implemented four component of Project-Based Learning in teaching speaking skill, namely support system, reaction principle, sosial system and instructional impact. Teacher also uses five stages in teaching and learning in the implementation of Project-Based Learning model in class nine in SMP Gajah Mada Medan, namely designing a plan for the project, creating a schedule, monitoring students and the progress of the project, assessing the outcomes, and evaluating the experiences. In addition students look encouraged to express themselves creatively through several learning activities. They create class project, discuss critically, learn to be independently and do many other things. In class students also enjoy learning with the project, because it is interesting and help them to be creative and more active in speaking English.

b. Suggestion

At the end of this chapter, the implementation of Project-Based Learning model in teaching speaking skill for grade nine in SMP Gajah Mada Medan. Researcher wants to put forward some suggestions as follows:

For English teacher, teacher should be more disciplining students about predetermined schedule, and for other teachers, researcher suggest to use Project-Based Learning in teaching English because it can make students have enthusiasm, active, creative, and improve the students' speaking ability.

For students are suggested to more diligent to presentation practice, than they can more confident speaking English inside and outside the classroom.

For other researchers, Project-Based Learning is one of the interesting model that can be implement by teacher in classroom to improve students' speaking skill. The researcher hope that the result of this study can used as a reference for researchers who want to conduct similar research with this study.
