

ABSTRAK

ERLY NURAFNI GULTOM. Hubungan Antara Fasilitas Perpustakaan Dan Minat Membaca Siswa Kelas V SD Negeri 106166 Marindal II. Skripsi. Medan: Fakultas Ilmu Penddidikan Universitas Negeri Medan, 2024.

Peneliti ini bertujuan untuk mengetahui hubungan antara fasilitas perpustakaan dan minat membaca siswa kelas V SD Negeri 106166 Marindal II. Adapun jenis penelitian ini adalah asosiatif (hubungan) kausal dengan teknik korelasional. Subjek dalam Penelitian ini adalah seluruh siswa kelas V SD Negeri 106166 Marindal II yang berjumlah 44 siswa. Pengambilan data menggunakan observasi, angket fasilitas perpustakaan variabel (X) dan angket minat membaca siswa variabel (Y) dan dokumentasi. Teknik analisis data menggunakan korelasi *Product Moment*. Berdasarkan data yang telah terkumpul diperoleh hasil perhitungan kolerasi yaitu $R_{xy} = 0,70 > r_{tabel} = 0,304$. Hasil pengujian hipotesis menunjukkan bahwa terdapat hubungan antara fasilitas perpustakaan dan minat membaca siswa kelas V SD Negeri 106166 Marindal II. Penelitian ini menyimpulkan terdapat hubungan antara fasilitas perpustakaan dan minat memebaca siswa kelas V SD Negeri 106166 Marindal II.

Kata Kunci: Hubungan, Fasilitas Perpustakaan, Minat Membaca

ABSTRACT

ERLY NURAFNI GULTOM. The Relationship Between Library Facilities and Reading Interest of Class V Students SD Negeri 106166 Marindal II. Skripsi. Medan: Faculty of Education Universitas Negeri Medan, 2024.

This researcher aims to determine the relationship between library facilities and fifth grade students' interest in reading SD Negeri 106166 Marindal II. This type of research is causal associative (relationship) with correlational techniques. The subjects in this research were all class V students at SD Negeri 106166 Marindal II, totaling 44 students. Data collection used observation, variable library facilities questionnaire (X) and variable student reading interest questionnaire (Y) and documentation. The data analysis technique uses Product Moment correlation. Based on the data that has been collected, the correlation calculation results are obtained, namely $R_{xy} = 0,70 > r_{tabel} = 0,304$. The results of hypothesis testing show that there is a relationship between library facilities and interest in reading in class V of SD Negeri 106166 Marindal II. This research concludes that there is a relationship between library facilities and interest in reading in class V of SD Negeri 106166 Marindal II.
