

FOREWORD

Praise be to God Almighty for giving his blessings in preparing a thesis entitled “Development of Android Based Interactive Learning Media on Global Warming Topics to Improve Student Learning Outcomes”. This thesis was made in addition to fulfilling the requirements to obtain a bachelor's degree at the Faculty of Mathematics and Natural Sciences (FMIPA), Medan State University.

The process of preparing this thesis faced many ups and downs but with the permission of the Lord Jesus and the guidance and assistance of various parties this thesis can be completed according to the procedures and standards that apply at FMIPA UNIMED. The success and preparation of the thesis cannot be separated from the enthusiasm, support, prayers, help, and advice from various parties. Therefore, on this occasion the author would like to express his sincere gratitude to:

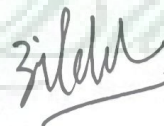

1. Prof. Dr. Baharuddin, ST, M.Si as the Rector of Medan State University.
2. Mrs. Dr. Ani Sutiani, M.Si as the Dean of FMIPA of Medan State University.
3. Mrs. Dr. Dewi Wulandari, M.Si as the thesis supervisor who has given a lot of direction, time, help, guidance, motivation and advice to the author until the writing of the thesis can be completed properly and become a parent while on campus.
4. Dr. Juniastel Rajagukguk M.Si., as my academic advisor during my study at Medan State University.
5. Prof. Dr. Sahyar, M.S., M.M., Mr. Budiman Nasution M.Si., and Mrs. Dr. Erniwati Halawa, M.Si. as the author's examining lecturers who have provided a lot of criticism and suggestions for improvement starting from the proposal seminar to the stage of defending the thesis so that this thesis can be completed properly.
6. To all physics lecturers who have taught during lectures, so that the author gets new knowledge every day.
7. My beloved parents, Mr. R. Lingga and Mrs. S. Br Ginting for their prayers, support for every process the author faces, and the trust given to the author

during college. Thank you for educating, caring, giving love, and helping to solve the problems faced by the author while in college. Parents who always support the author's lectures. Brother Albinus Lingga, Sister Seviyani Br Lingga, Sister Mira Br Karo and all extended family who always provide encouragement, motivation, assistance, and become donors during college

8. The author's best friends Estetia Alma, Dea Melani, and Efraim Batunanggar who always support, pray, and give joy to the author. To all Laro members who also continue to encourage this writing. To the entire Urta Group (Leonardo Sihaloho, Cindy Panjaitan, Friska Hariyani, Lilis Suryani Waruwu) who have accompanied and supported the author's lectures from beginning to end.
9. Rama Yana Purba, Rodearna Siregar, Vebri Filiandi and all General Physics laboratory assistants who always provide assistance to the author, accompany during research, provide encouragement, and a place to complain about the author in completing the thesis. Thank you for being a friend who listens without judgment.
10. PESP 2020 Writer classmates who have always been friends while studying at our beloved campus and who have accompanied and helped the author a lot.

The author apologizes for any mistakes that have been made, and realizes that this thesis is far from perfection. Therefore, it is hoped that constructive input for the perfection of this thesis in the future and hopefully this thesis will provide benefits to encourage further research research..
