CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusions

After each song lyrics as the data of this study has been analyzed, conclusion were described below.

1. The writer found 8 types from 9 types of Slang Words in the 5 of Katy Perry's song lyrics analyzed from Yule's (2010) theory of slang words. The identified types were Coinage (11), Borrowing (8), Compounding (3), Blending (31), Clipping (4), Conversion (2), Acronym (2), and Derivation (1).

2. The elaboration of each slang word types that has been provide in the previous chapter was quite related and effective to the technique of analyzing, the research method, the theory approaches, and the discussions.

B. Suggestions

There are several suggestions that the writer could offer to reader towards slang words teaching and learning process, they were.

1. It was suggested that the next researcher continue their study of slang terms by studying words that helped them reach their own conclusions at the beginning and during the investigation. It was also crucial that the results of the following research can be turned into speeches, interviews, or movie scripts.

2. It was suggested that readers of this study, particularly students, grow and improve. Because there were still many aspects of slang's qualities that might be researched. And it was hoped that the other authors would gather more slang-related articles, books, and journals in order for this study to continue.

3. While the writer considers this thesis was far from ideal, it was proposed that other researchers can continue to explore this related topic and offer more thorough materials, investigations, and analyses.
