

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter was provided by the writer to presents the conclusion of the research and also to give the suggestion for the readers, English Language learners, the future researcher and also the society about the viewpoints of people about LGBT community in the linguistic field.

A. Conclusion

Based on the analysis of the emotion of Netizens' responses for LGBT content in TikTok conclusions are drawn as the following:

- 1) After the findings has done, the researcher found that LGBT content in the social media platform is not only seen by the hatred but also got welcomed by some people there. The responses itself comes by transactions between the contents and Netizen who give the reaction after the action that was comes from the Gay Marriage Content by *@nickandant* and the reactions that given by Netizen was come in the various ways like the personal thoughts, hierarchy of standards, society standards that happened in the everyday-lives and also it came from the biological science.
- 2) This research was concludes to the emotion by the Netizen with Cognitive Appraisal Theory of Emotion that has 3 emotions and the most comments that showing the disapproval, disliking and displeased because the hierarchy of standard and biological science. For instance, the responses that *@nickyandant* got for their marriage content in TikTok

was disapproval for religion obligation and reproductive systems. But there are also the comments that showing Being Pleased and Liking because they support the campaign that was raise the head like #LOVEWINS and the way they tried to radiates the love and positive towards all the human.

B. Suggestions

In this research, the writer fully admitted that there is weaknesses that occurred in this research since there were a limitation. Therefore, several suggestions were recommended by the writer to the readers towards the responses of Netizen to LGBT content in TikTok, as presented below:

1. For readers it would be enrich the knowledge and give more sight about the responses and the emotions behind it to the LGBT issue in this world.
2. For the future researchers are advised to more expand the analysis about Thematic Analysis, Transactional Reader Response and also the Cognitive Appraisal Theory of Emotion that united in the Semantic Study.
