

## ACKNOWLEDGMENT

*Bismillahirrahmanirrahiim. Alhamdulillah*, with profound gratitude and humility, I extend my praises and thanks to Allah SWT, the Almighty, for His abundant grace, guidance, and ease that have enabled me to complete this thesis successfully. This long journey, filled with challenges, setbacks, and perseverance, has finally reached its conclusion. However, behind every struggle lies an immense force that has constantly driven me forward—prayers, support, and love from many people who have never ceased to strengthen my spirit.

First and foremost, my deepest appreciation is dedicated to my beloved parents, Mr. Syamsul Bahri Hasibuan and Mrs. Ubaon Nasution (who now rests peacefully in heaven). Without their prayers and unconditional love, I would not have been able to stand at this point. May every effort I have made bring them pride and blessings to our family. I also express my gratitude to my dear siblings, Daman Huri Hasibuan, Nur Amaliah Hasibuan, Kholida Hapni Hasibuan, and Muhammad Sayis Hasibuan, as well as my brothers- and sisters-in-law, Irma Lesmana Sari Silalahi, Rosman Sayuti Nasution, Rohim, and my beloved nieces and nephews (Rehan, Afif, Hafiz, Izza, Nafisah, Luthfi, and Ifah)—you have always been my home, my source of comfort, and my greatest motivation.

My sincere appreciation also goes to Dr. Ani Sutiani, M.Si., Dean of FMIPA Medan State University, Khairiza Lubis, S.Si., M.Sc., Ph.D., Head of the Biology Department, and Wina Dyah Puspita Sari, S.Si., M.Si., Head of the Natural Science Education Study Program.
