

ABSTRAK

Risky Ameta. “Hubungan Kemampuan Berpikir Kreatif dengan Hasil Praktek Kue Indonesia di SMK Negeri 1 Pantai Labu”. Pendidikan Kesejahteraan Keluarga. Pendidikan Tata Boga. Fakultas Teknik. Universitas Negeri Medan. 2025.

Penelitian ini bertujuan untuk mengetahui : (1) Kemampuan Berpikir Kreatif; (2) Hasil Praktek Kue Indonesia; (3) Hubungan Kemampuan Berpikir Kreatif dengan Hasil Praktek Kue Indonesia. Tempat penelitian dilakukan di SMK Negeri 1 Pantai Labu. Waktu penelitian bulan April-Juni 2025. Populasi dalam penelitian ini seluruh siswa kelas XI Tata Boga dengan sampel 30 orang siswa. Teknik pengambilan sampel secara *total sampling*, sehingga diperoleh sampel sebanyak 30 siswa. Teknik pengumpulan data menggunakan angket, untuk data kemampuan berpikir kreatif untuk hasil kue Indonesia melalui penilaian hasil praktik. Teknik analisis data menggunakan deskripsi data, uji persyaratan analisis, dengan uji normalitas, dan uji linearitas, uji hipotesis dengan uji korelasi *product moment*.

Hasil penelitian menunjukkan bahwa tingkat kecenderungan kemampuan berpikir kreatif termasuk cenderung tinggi sebesar 80,00 persen. Tingkat kecenderungan hasil praktek kue Indonesia siswa cenderung baik sebesar 80,00 persen. Hasil analisis korelasi *Product Moment* terdapat hubungan yang positif dan signifikan antar Kemampuan Berpikir Kreatif dengan hasil praktek mengolah Kue Indonesia siswa dengan koefisien korelasi *Product Moment* $r_{hitung} > r_{tabel}$ yaitu $(0,87 > 0,36)$ pada taraf signifikan 5 persen. Artinya semakin tinggi kemampuan berpikir kreatif maka semakin tinggi hasil praktek kue Indonesia siswa. Hasil koefisien determinasi sebesar 75,69% persen, artinya berpikir kreatif memberikan kontribusi 75,69 persen terhadap hasil praktek kue Indonesia, sedangkan 24,31 persen faktor lain yang diluar penelitian ini.

ABSTRACT

Risky Ameta. "Relationship of Creative Thinking Ability with the Results of Indonesian Cake Practices at SMK Negeri 1 Pantai Labu". Family welfare education. Catering Education. Faculty of Engineering. Medan State University. 2025.

This study aims to determine: (1) Creative Thinking Ability, (2) The Results of Indonesian Cake Practice, and (3) The Relationship Between Creative Thinking Ability and the Results of Indonesian Cake Practice. The research location was at SMK Negeri 1 Pantai Labu. The study was conducted from April to June 2025. The population in this research consisted of class XI Culinary Arts students, with a total sample of 30 students. Data collection was carried out using questionnaires for creative thinking ability, while Indonesian cake practice results were assessed through practical evaluations. The data analysis techniques used included descriptive analysis, prerequisite tests, namely normality and linearity tests, and hypothesis testing using the product moment correlation.

The results of the study showed that the level of tendency of the creative thinking ability variable was in the medium category with a percentage of 80.00%, while the tendency of the Indonesian cake practice results variable was in the high category with a percentage of 90.00%. The Product Moment correlation analysis showed that there was a positive and significant relationship between Creative Thinking Ability and Indonesian Cake Practice Results with a correlation coefficient (r) of 0.587 and a determination coefficient (r^2) of 0.345. This indicates that creative thinking ability contributes 75.69% to the results of Indonesian cake practice, while 24.31% is influenced by other factors outside this study.
