ABSTRACT

Public Junior High Schools in Barusjahe District, Karo Regency, 2025 (Thesis Supervisor: Rifqi Aufan) Medan: Faculty of Sport Science, Medan State University

The purpose of this study was to determine the availability, condition, and ownership status of physical education facilities and infrastructure at public junior high schools in Barusjahe District, Karo Regency. The population in this study was four public junior high schools in Barusjahe District, Karo Regency.

The research method used was descriptive qualitative research, describing a survey of physical education facilities and infrastructure at public junior high schools in Barusjahe District, Karo Regency. Based on the nature of the problem, data collection was conducted through a survey, while observation sheets and interviews with physical education teachers were used as data collection tools.

The data obtained were calculated and analyzed to determine the average percentage of physical education facilities and infrastructure. The results showed that the availability of physical education facilities at public junior high schools in Barusjahe District was 11.07%, which is classified as very poor; and the availability of physical education infrastructure at public junior high schools in Barusjahe District was 58.33%, which is classified as moderate. The condition of the physical education facilities at the Junior High Schools in Barusjahe District was 9.36%, which is classified as very poor. The condition of the physical education infrastructure at the Junior High Schools in Barusjahe District was 54.17%, which is classified as moderate. The ownership status of the physical education facilities and infrastructure at the Junior High Schools in Barusjahe District is 100% privately owned.
