ABSTRAK

Febriani. 5193342025. "Hubungan Kepercayaan Diri dengan Hasil Praktek Fusion Food di SMK Pariwisata Imelda Medan". . Pendidikan Tata Boga. Pendidikan Kesejahteraan Keluarga. Fakultas Teknik. Universitas Negeri Medan. 2025.

Penelitian ini bertujuan untuk mengetahui : (1) Kepercayan Diri, (2) Hasil Praktek Fusion Food Siswa (3) Hubungan Kepercayaan Diri dengan Hasil Praktek Fusion Food. Tempat Penelitian SMK Pariwisata Imelda Medan. Waktu penelitian bulan Februari-Mei 2026. Populasi dalam penelitian ini seluruh siswa kelas XI Kuliner dengan jumlah 35 orang siswa. Teknik pengambilan sampel secara total sampling sehingga diperoleh sampel sebanyak 35 orang siswa. Teknik pengumpulan data menggunakan angket untuk kepercayaan diri dan hasil praktek membuat fusion food melalui penilaian hasil praktek. Teknik analisis data secara deskripsi data, uji kecenderungan dan uji persyaratan analisis dengan uji normalitas dan uji linieritas serta uji hipotesis dengan uji korelasi *product moment*.

Berdasarkan hasil penelitian ini menunjukkan bahwa tingkat kecenderungan kepercayaan diri siswa termasuk kategori cenderung tinggi sebesar 51,43 persen. Tingkat kecenderungan hasil praktek fusion food termasuk kategori cenderung baik sebesar 45,71 persen. Hasil analisis korelasi *product moment* terdapat hubungan yang positif dan signifikan antar kepercayaan diri dengan hasil praktek fusion food dengan nilai rxy = 0,86 dan nilai r_{tabel}= 0,33 sehingga $r_{hitung} > r_{tabel}$ (0,86>0,33) pada taraf signifikan 5 persen. Artinya semakin tinggi kepercayaan diri maka semakin tinggi hasil praktek fusion food. Koefisien determinasi sebesar $0,86^2$ = 0,73 persen, hal ini menunjukkan bahwa (67%) variabel kepercayaan diri memberikan kontribusi terhadap hasil praktek fusion food, sedangkan 27 persen diperoleh dari faktor lain diluar penelitian ini.

Kata Kunci: Kepercayaan Diri, Hasil Praktik, Fusion Food

ABSTRACT

Febriani. 5193342025. "The Relationship Between Self-Confidence and Fusion Food Practical Results at Imelda Tourism Vocational School, Medan". Culinary Arts Education. Family Welfare Education. Faculty of Engineering. State University of Medan. 2025.

This study aims to determine: (1) Self-Confidence, (2) Students' Fusion Food Practical Results, and (3) the Relationship Between Self-Confidence and Fusion Food Practical Results. The research location is Imelda Tourism Vocational School, Medan. The research period is February-May 2026. The population in this study was all 11th grade Culinary students, totaling 35 students. The sampling technique used total sampling, resulting in a sample of 35 students. Data collection techniques used questionnaires to assess self-confidence and fusion food practical results through assessment of practical results. Data analysis techniques used data description, trend testing, and analysis requirements testing with normality and linearity tests, as well as hypothesis testing with product-moment correlation tests.

The results of this study indicate that the level of student self-confidence tends to be high at 51.43 percent. The tendency level of the results of fusion food practice is included in the category of tending to be good at 45.71 percent. The results of the product moment correlation analysis show a positive and significant relationship between self-confidence and the results of fusion food practice with a value of rxy = 0.86 and a value of rtable = 0.33 so that rcount> rtable (0.86>0.33) at a significance level of 5 percent. This means that the higher the self-confidence, the higher the results of fusion food practice. The coefficient of determination is 0.862 = 0.73 percent, this shows that (67%) the self-confidence variable contributes to the results of fusion food practice, while 27 percent is obtained from other factors outside this study.
