ABSTRAK

RENY FURNAWATI SITANGGANG. Hubungan Tingkat Pendidikan dengan Pemahaman Pengelolaan Limbah Rumah Tangga pada Anggota Kelompok Wanita Tani (KWT) di Desa Rianiate. Skripsi. Medan: Fakultas Ilmu Pendidikan, Universitas Negeri Medan, 2026.

Penelitian ini dilaksanakan dengan tujuan untuk mengetahui tingkat pendidikan anggota Kelompok Wanita Tani (KWT), mengetahui tingkat pemahaman anggota Kelompok Wanita Tani (KWT) tentang pengelolaan limbah rumah tangga, serta mengetahui hubungan antara tingkat pendidikan dengan pemahaman pengelolaan limbah rumah tangga pada anggota Kelompok Wanita Tani (KWT) di Desa Rianiate, Kecamatan Pangururan, Kabupaten Samosir. Penelitian ini menggunakan pendekatan kuantitatif dengan jenis penelitian korelasional. Populasi penelitian berjumlah 31 anggota Kelompok Wanita Tani (KWT). Sampel penelitian berjumlah 31 orang yang diambil menggunakan teknik total sampling. Data dikumpulkan menggunakan angket, selanjutnya data dianalisis menggunakan statistik deskriptif dan uji korelasi Pearson Product Moment. Hasil penelitian menunjukkan bahwa tingkat pendidikan anggota Kelompok Wanita Tani (KWT) berada pada kategori sedang dan tingkat pemahaman pengelolaan limbah rumah tangga berada pada kategori tinggi. Hasil uji korelasi menunjukkan bahwa terdapat hubungan yang positif dan signifikan antara tingkat pendidikan dengan pemahaman pengelolaan limbah rumah tangga pada anggota Kelompok Wanita Tani (KWT) di Desa Rianiate, Kecamatan Pangururan, Kabupaten Samosir dengan nilai koefisien korelasi sebesar 0,610 dan nilai signifikansi sebesar 0,000 ($p < 0,05$). Berdasarkan hasil penelitian tersebut, disarankan kepada pemerintah desa, penyuluh, dan pihak terkait agar terus meningkatkan kegiatan edukasi dan pelatihan mengenai pengelolaan limbah rumah tangga sehingga pemahaman masyarakat dapat semakin meningkat.

Kata kunci: Tingkat Pendidikan, Pemahaman, Pengelolaan Limbah Rumah Tangga, Kelompok Wanita Tani (KWT).

ABSTRACT

RENY FURNAWATI SITANGGANG. The Relationship between Educational Level and Understanding of Household Waste Management among Members of the Women's Farmer Group (KWT) in Rianiate Village. Skripsi. Medan: Faculty of Education, State University of Medan, 2026.

This study was conducted to determine the educational level of members of the Women's Farmer Group, to identify their level of understanding of household waste management, and to examine the relationship between educational level and understanding of household waste management among members of the Women's Farmer Group in Rianiate Village, Pangururan Subdistrict, Samosir Regency. This research employed a quantitative approach using a correlational research design. The population consisted of 31 members of the Women's Farmer Group. The sample comprised 31 respondents selected using the total sampling technique. Data were collected through questionnaires and analyzed using descriptive statistics and the Pearson Product-Moment correlation test. The results showed that the educational level of the members of the Women's Farmer Groupwas in the moderate category, while their understanding of household waste management was in the high category. The correlation analysis revealed a positive and significant relationship between educational level and understanding of household waste management among members of the Women's Farmer Group in Rianiate Village, Pangururan Subdistrict, Samosir Regency, with a correlation coefficient of 0.610 and a significance value of 0.000 ($p < 0.05$). Based on these findings, it is recommended that the village government, extension workers, and other related stakeholders continue to provide education and training programs on household waste management in order to further improve the community's understanding.

Keywords: Educational Level, Understanding, Household Waste Management, Women's Farmer Group
