ABSTRAK

Natalin Enzel Nadeak, NIM.3213311016 "Peran Pemerintah Desa Dalam Pengelolaan Sampah Di Desa Marindal 1 Kecamatan Patumbak". Jurusan Pendidikan Pancasila Dan Kewarganegaraan Fakultas Ilmu Sosial Universitas Negeri Medan.

Pengelolaan sampah merupakan salah satu permasalahan lingkungan yang memerlukan peran aktif dari pemerintah desa. Penelitian ini bertujuan untuk menganalisis peran pemerintah Desa Marindal 1 dalam pengelolaan sampah, dengan fokus pada kebijakan, implementasi, serta tantangan yang dihadapi. Subjek penelitian ini meliputi Kepala Desa, Kepala Dusun, dan Tokoh Masyarakat sebagai pihak yang berperan langsung dalam sistem pengelolaan sampah di desa. Penelitian ini menggunakan metode kualitatif dengan pendekatan penelitian lapangan. Pengumpulan data dilakukan melalui wawancara mendalam, observasi, dan dokumentasi. Data yang diperoleh dianalisis menggunakan model analisis data Miles dan Huberman, yang meliputi tiga tahapan utama: reduksi data, penyajian data, dan verifikasi/kesimpulan. Hasil penelitian menunjukkan bahwa Pemerintah Desa Marindal I memiliki peran penting dalam mengatur dan mengawasi pengelolaan sampah melalui kebijakan iuran kebersihan, penyediaan sarana seperti armada pengangkut, serta kegiatan gotong royong rutin. Meskipun belum memiliki Peraturan Desa khusus, upaya ini sudah sejalan dengan Peraturan Daerah Kabupaten Deli Serdang Nomor 4 Tahun 2021 tentang Pengelolaan Sampah. Pemerintah desa juga aktif melakukan sosialisasi dan mengajak warga untuk menjaga kebersihan lingkungan. Namun, keterbatasan fasilitas seperti hanya satu TPS untuk 12 dusun dan minimnya dana operasional menjadi kendala utama. Meski demikian, masyarakat tetap menunjukkan partisipasi tinggi melalui pembayaran iuran, keterlibatan dalam kegiatan kebersihan, dan pengolahan sampah organik menjadi kompos. Temuan ini menunjukkan bahwa pengelolaan sampah di Desa Marindal I telah mengarah pada partisipasi berkelanjutan, meski masih diperlukan penguatan regulasi dan dukungan sarana agar lebih optimal.

Kata Kunci: Pemerintah Desa, Pengelolaan Sampah, Kebijakan Lingkungan

ABSTRACT

Natalin Enzel Nadeak, Student ID 3213311016. The Role of Village Government in Waste Management in Marindal I Village, Patumbak District. Department of Pancasila and Civic Education, Faculty of Social Sciences, Universitas Negeri Medan.

Waste management is one of the environmental issues that requires active involvement from village governments. This study aims to analyze the role of the Marindal I Village Government in waste management, with a focus on policy formulation, implementation, and the challenges encountered. The research subjects include the Village Head, Hamlet Heads, and community leaders as stakeholders directly involved in the village waste management system. This study employed a qualitative research method with a field research approach. Data were collected through in-depth interviews, observation, and documentation. The collected data were analyzed using the Miles and Huberman data analysis model, which consists of three main stages: data reduction, data display, and conclusion drawing/verification. The results indicate that the Marindal I Village Government plays a significant role in regulating and supervising waste management through cleanliness fee policies, the provision of facilities such as waste transportation vehicles, and routine community mutual cooperation activities. Although the village has not yet established a specific Village Regulation on waste management, these efforts are in line with Deli Serdang Regency Regional Regulation Number 4 of 2021 concerning Waste Management. The village government is also actively engaged in conducting socialization activities and encouraging residents to maintain environmental cleanliness. However, limitations in facilities, such as the availability of only one Temporary Waste Disposal Site (TPS) serving twelve hamlets and limited operational funds, remain major challenges. Despite these constraints, the community demonstrates a high level of participation through regular payment of waste management fees, involvement in cleanliness activities, and the processing of organic waste into compost. These findings suggest that waste management in Marindal I Village has progressed toward sustainable community participation, although stronger regulatory frameworks and improved facility support are still required for optimal implementation.
