

ACKNOWLEDGMENT

Firstly, the greatest thankfulness is given to Almighty God, Jesus Christ who always that gives blessing and provides health, wisdom, strength, spirit, knowledge and material for writer in composing this thesis accordance with the planned time.

The title of thesis is “Implementation of Collaboration PBL with Two Stay Two Stray Model to Increase Curiosity and Student’s Achievement in Chemistry on Solubility and Solubility Product Topic” that arranged to obtain the degree of Sarjana Pendidikan in Chemistry Department, Faculty of Mathematics and Natural Science, State University of Medan (UNIMED).

In this opportunity, the writer would like to express the thanks and great appreciation to Alm. Drs. Rahmat Nauli, M.Si, big thanks also for Dr. Iis Siti jahro, M.Si as my thesis supervisor for this valuable time spent in giving guidance, advices, motivation and suggestions during completing this thesis. The writer also thanks to Prof. Drs. Manihar Situmorang, MSc., Ph.D., Dr. Ajat Sudrajat, M.Si., and Dr. Marham Sitorus, M.Si as examiner for this thesis that giving me advices, suggestion, guidance and constructive comments for this thesis’s completeness.

The writer also say thanks to Dr. Asrin Lubis, M.Pd as the Dean of Mathematics and Natural Science Faculty, State University of Medan, Dr. Iis Siti Jahro, M.Si as the coordinator Bilingual Department, Nora Susanti, S.Si, Apt., M.Sc., and Mr. Syamsudin as administrator of Bilingual Office for their advices and other necessary administrative business. The great thanks are also given to Drs. Jamalum Purba, M.Si as my academic supervisor for this guidance during my academic process in this University. The writer also say thanks to Dr. Iis Siti Jahro, M.Si as my instrument’s validator in this research.

The author appreciation also given to principal of SMA Negeri 1 Air Putih, H. Abdul Maas, S.Pd; Principal of SMA Negeri 1 Sidikalang, Drs. Alben Sianturi; Principal of SMA Negeri 1 Brastagi, Alberto Colia, M.Pd., and also all teachers who gave me chance to do the research there. It is also given to principle of SMA Negeri 1 Air Putih who gave place for writer in examining the instrument test.

A deepest love, appreciation and thank you so much also for my dearest parents A. Purba and N. Pakpahan, also for dearest Rade's family, my sister Lampala Purba, Ruth Purba, and little sister Debora Purba for their motivation, advice, prayers and financial support to me during my university lecture process.

Special thanks are given to all my love classmate in Bilingual chemistry Education 2012 that always gives me the best memory in my education process especially for Lady Ofina Boangmanalu, Meliana, Biuti and Nur'saadah (my thesis team), Fridayuni (tel), Lisna (nong), Nova (bor), and Rina (men) for their kindness in my academic process and spending quality time in many times of our limited time. The writer also would like to say thanks to sissy Rina Rumahorbo and sissy Fretty Sinaga as my PKK in UKM KP's organization, Euagllion Small Group (Arif, Anggi, Nova, Novel and Lestari) for kindness and prayers in completeness this thesis. And everyone whose names can't be mentioned one by one for your support and helping in my thesis process.

Finally, writer hope this can be used for those who would like to explore more about learning model in solubility and solubility product topic. The writer realize that this thesis is still far from being perfect therefore critique and suggestion are needed for further improvement of this thesis.

Medan, June 2016

The
writer,

Hariaty Indra Lesmana
